BORN
01-01-1994 (32)

SKILLS

- TypeScript
- Python
- Tests and reviews

STRENGTHS

Clear reviews
Writes the comment once so the next review is shorter.

Structure
Puts a slow query into one sentence a teammate can test.

PROJECTS

Catalogue search
Stayed under a second after the collection passed a million rows.

Review checklist
Cut the repeat comments on pull requests.

PROFILE

In short
Rae Okonkwo is a made-up software engineer from Example City. This CV belongs to nobody. Tools sit in the sidebar. Projects, with a result, sit on the page.

Application as a software engineer, a made-up vacancy

EXPERIENCE

Software engineer — 2022 - 2024

Example Catalogue Ltd

- Shipped a search path that stayed under a second after a million made-up rows.
- Tested the slow queries before they reached the night job.

Software engineer — 2020 - 2022

Example Bureau

- Wrote a review checklist that cut the repeat comments on pull requests.
- Kept the notes when a made-up team changed the plan the same afternoon.

EDUCATION

Computer science — 2016 - 2020

Example University

- A graduation project about a search index that never left the classroom.

Foundation year — 2015 - 2016

Example College

- Type, tests and a first practice site.

The organisations named here exist only in this example.

- The search result is one sentence a stranger can check.
- The review checklist is one page.
- The practice site belonged to a team that was never real.

This example is not a real application.
